SECTION MAP

Sec. 13 Twp. 11 N. R. 20

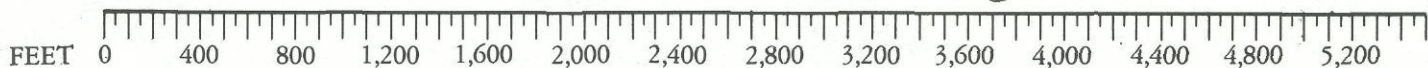

Scale: 1 inch = 800 feet (each small square = 10 acres)

Show by a cross (X) the location of point of diversion (surface water source) or point of withdrawal (ground water source). For ground water applications, show by a circle (O) the locations of other wells or works within a quarter of a mile.

Indicate traveling directions from nearest town in space below.

Once in Zillah turn North on 5th, which becomes
Roga Drive after crossing highway 12. Travel north on Roga Drive
3 miles from Zillah to my sight. My driveway is the
gravel extension of Gilbert which runs parallel to Highland
drive, but is north of Highland. Approximately one quarter
mile ^{before} ~~from~~ Gilbert on the right hand side of the road is a small green
house with a white metal roof. Enter the access road just south of this house.
Proceed past a green metal shop (white roof) and a black cold room with metal roof
to the bottom of the draw. This is the proposed sight of the new well.

Detach this scale at the perforation, fold excess paper under or cut off excess by cutting along the scale line. This scale corresponds to the SECTION MAP above. You can read feet directly from this scale to outline property and locate points of diversion or withdrawal on the SECTION MAP. Enclose this map along with the application and \$10.00 examination fee.

Your water right application will be processed by the Regional Office of the Department of Ecology having jurisdiction in the area in which your water works are located. **Please submit your completed application form, maps, sketches and \$10.00 examination fee to the appropriate Regional Office.**
